Compare to your favorite fitting shirt:

Follow 3 Easy Steps and Get the Right Size!

1. Measure a favorite fitting Button Down Fishing Shirt one inch below the armpits while it lays flat on a table. Use a measuring tape or a yard stick.

2. Go to the attached Size Chart below and look for the row titled "Chest".

3. Find the closest to your shirt's measurement, and choose that size. If you are in between, go bigger.

There are no returns for sizing issues on Custom Orders. All manufacturers have different sizes.

Please take some time with these measurements and instructions to get the right size.

Print Large Graphics and the shirt remains as breathable as before it was decorated.
The great advantage of dye sublimation is that we literally dye the fabric, we do not adhere a rubber plastic silkscreen patch on the back that traps sweat and heats up your back.

We cannot print white ink using dye sublimation.
Because we dye the fabric with dye sublimation inks, the fabric remains breathable all over even on the image area. Because these inks are transparent, they combine with the shirt color and art/logos appear slightly different from shirt color to shirt color. **Whatever is white in your image will be the shirt color showing through. See above image of the difference between silkscreen that can print white and dye sub.**

We cannot print on dark color shirts using dye sublimation.
Because these inks are transparent, they combine with the shirt color and art/logos disappear on black, navy and other dark shirt colors. Dark color shirts require silk screen transfer printing.

There is no limit to the number of ink colors - no extra charge.
However to get the Quantity Bonus FREE SHIRTS, each back, chest and sleeve must have the same art on the whole order.
You can use unlimited ink colors on each area, and mix in any style/size/gender/shirt color into your minimum 24 or higher. To get your discount or free shirts for quantity orders, all art must be the same on each shirt in the minimum 24.
